VI PHAN

Software Engineer (Frontend / Full-Stack)
Thu Duc City, Ho Chi Minh City, Vietnam • (+84) 332 904 463 • phanhavi136@gmail.com
LinkedIn • GitHub • Portfolio

Software engineer with 3+ years shipping production web applications in React, Next.js and TypeScript, plus Salesforce (LWC/Apex). Enjoys owning a feature end-to-end — clarifying requirements with stakeholders, validating designs, building the UI and reviewing the team's code — and is expanding into backend and full-stack work to own more of the product.

EXPERIENCE

National Australia Bank (NAB) – StarCamp Programme — Ho Chi Minh City, Vietnam
Software Engineering Intern — July 2026 – October 2026

- Build frontend features for a banking capstone product on NAB's internal micro-frontend platform using React, TypeScript, Redux and NAB's enterprise design system, meeting its design and accessibility standards, within an Agile team.
- Co-developed a GraphQL Backend-for-Frontend layer, owning API integration and frontend data contracts.
- Acted as the team's de-facto Business Analyst: elicited and documented functional requirements and validated Figma designs against design-system and technical constraints before implementation.
- Led the team's front-end code reviews, enforcing TypeScript/React best practices and architectural consistency; defined the Git workflow (branching, PR process, pre-commit checks) and kept Vitest coverage high.

National Australia Bank (NAB) – WeCamp Programme — Ho Chi Minh City, Vietnam
Full-Stack Software Engineering Trainee — March 2026 – May 2026

- Led a team of 5 engineers to deliver a frontend capstone project from zero to demo; awarded 2nd Place MVP out of the cohort.
- Completed structured training in JavaScript fundamentals, data structures & algorithms and Big-O analysis, OS fundamentals (processes, threads, memory) and HTTP/DNS/TCP networking.

Visiolusion — Remote (Germany)
Frontend Developer — August 2025 – December 2025

- Built the frontend for matter-type workflows in a law firm's internal email-processing platform (Next.js), used daily by ~50 legal staff to triage incoming client mail.
- Led a refactor of component structure and data-fetching logic that materially improved performance and maintainability.
- Worked directly with client stakeholders, backend and design in a remote international Agile team to define requirements and ship features.
- Used AI-assisted tooling (Claude Code) to accelerate delivery and refine complex algorithm design.

DataHouse Asia — Ho Chi Minh City, Vietnam
Frontend Developer — February 2024 – February 2025

- Shipped 3 feature-rich, responsive websites in React and TypeScript, and 2 major ERP modules in collaboration with UI/UX, BA, Backend and QA teams.
- Improved responsiveness of a core React application by refactoring state management and eliminating unnecessary re-renders (useMemo, React.memo, component restructuring).
- Optimised the main dashboard's critical rendering path (code splitting, lazy loading, lighter initial payload) to reduce perceived load time.

DataHouse Asia — Da Nang, Vietnam
Salesforce Developer — November 2022 – January 2024

- Built property-tax features for a US county government CAMA (Computer-Assisted Mass Appraisal) system in Salesforce — custom LWC/Aura UI and complex Apex calculation logic.
- Delivered 5 dynamic public portal forms for a US state Disability Compensation Division, integrating with Salesforce for real-time data synchronisation.

EDUCATION

APTECH — Da Nang, Vietnam
Advanced Diploma in Software Engineering — 2020 – 2022

University of Foreign Language Studies, University of Da Nang — Da Nang, Vietnam
Bachelor of Arts in English, GPA 3.41/4.0 — 2018 – 2022

SKILLS & LANGUAGES

Languages	TypeScript, JavaScript, GraphQL, HTML5, CSS3, Apex, Java (currently learning)
Frontend	React, Next.js, Redux, Tailwind CSS, Styled-Components, Micro-frontend Architecture, Design Systems, Lightning Web Components
Backend & APIs	Node.js, Express.js, Spring Boot, REST API design, GraphQL (BFF), OpenAPI, SQL, SOQL, NoSQL
Testing & Tooling	Vitest, Jest, Git/GitHub, Husky, Vercel, Figma, Bruno, Postman, Salesforce DX, Jira, Cursor, Windsurf, Claude Code
Practices	Agile/Scrum, Code Review, Unit Testing, Performance Optimisation, Requirements Analysis, Data Structures & Algorithms
Spoken Languages	Vietnamese (Native), English (Full Professional), Japanese (Limited Working)
