VI PHAN Software Engineer

Ho Chi Minh City, Vietnam | +84332904463 | phanhavi136@gmail.com | LinkedIn | GitHub | Portfolio

Software engineer with 3+ years shipping production web applications in React, Next.js, and TypeScript, plus Salesforce (LWC/Apex). Owns features end to end - from clarifying requirements and validating designs to building the UI and reviewing the team's code - while expanding into GraphQL BFF and full-stack development.

TECHNICAL SKILLS

Frontend	React, Next.js, TypeScript, JavaScript (ES6+), Redux, TanStack Query, Material UI (MUI), Tailwind CSS, HTML5, CSS3, LWC, Aura
Backend & APIs	GraphQL, Node.js, NestJS, Express.js, REST APIs, PostgreSQL, MySQL, TypeORM, SQL, Salesforce Apex, SOQL
Testing & Workflow	Vitest, Jest, Docker, Git, CI/CD Pre-Commit Quality Gates, Postman, Figma, WCAG Accessibility, Claude Code, Agile/Scrum

PROFESSIONAL EXPERIENCE

National Australia Bank (NAB) - Software Engineering Intern (StarCamp & WeCamp Programmes) Ho Chi Minh City, Vietnam | Mar 2026 - Oct 2026

- Shipped the frontend of a customer-engagement MVP across 4 two-week sprints on NAB's micro-frontend platform (React, TypeScript, Redux), delivering 5 end-to-end workflows - including multi-step onboarding, analytics dashboards, and campaign management - aligned with enterprise design-system and WCAG accessibility standards.
- Co-developed a GraphQL Backend-for-Frontend (BFF) layer (schemas, queries, mutations) and owned frontend data contracts, unifying backend service calls into single-trip composite payloads and decoupling UI state from backend schema changes.
- Owned requirements analysis for 3 of 5 project epics (60% of scope), translating business rules into functional specs and validating Figma designs against technical and design-system constraints pre-sprint to prevent mid-sprint rework.
- Led frontend code reviews to enforce TypeScript/React architectural consistency, establishing automated pre-commit quality gates, PR standards, and 80%+ Vitest coverage to keep sprint merges regression-free.
- Led a 5-engineer team during the WeCamp programme to build and ship a frontend capstone project from zero to live demo, winning 2nd Place MVP in the cohort.

Visiolusion - Frontend Developer Remote (Germany) | Aug 2025 - Dec 2025

- Built the frontend for 2 new multi-step matter workflows in a law firm's internal email-processing platform (Next.js), used daily by ~50 legal staff to triage incoming client mail.
- Refactored 2 existing single-file, multi-screen workflows into modular per-screen components using React Context and TanStack Query - fixing cross-step state bugs, making workflows easier to extend, and polishing the UI to pixel-perfect accuracy with positive feedback from the client.
- Leveraged Claude Code to accelerate boilerplate generation and prototype edge-case logic, shortening multi-screen implementation cycles while enforcing strict manual refactoring, TypeScript type safety, and code review before merging.

DataHouse Asia Da Nang & Ho Chi Minh City, Vietnam | Nov 2022 - Feb 2025

Frontend Developer Ho Chi Minh City, Vietnam | Feb 2024 - Feb 2025

- Cut initial load time on a 10-tab patient-profile page by ~40% (from ~12s to ~7s) by consolidating related section API calls and lazy-fetching data per active tab and on scroll.
- Consolidated 4+ duplicated Avatar implementations on the healthcare platform into a single, all-in-one shared sub-repository component (handling display, file upload, and live camera capture) - trimming unnecessary state and re-renders while providing one reusable component across the platform.
- Collaborated in a 3-developer frontend team to build a responsive public-service website for the Da Nang city government (a non-profit civic project) in React and TypeScript, delivering assigned modules end to end from UI/UX handoff to QA sign-off.
- Built dynamic forms, data-management tables, and REST API integrations across two large-scale products - an ERP system and the healthcare platform - working closely with BA, backend, and QA teams.

Salesforce Developer Da Nang, Vietnam | Nov 2022 - Jan 2024

- Built property-tax appraisal features for a US county government CAMA system in Salesforce, engineering custom LWC/Aura UI components and backend Apex calculation logic to automate complex parcel valuation rules.
- Delivered 5 dynamic public-portal forms for a US state Disability Compensation Division, creating and updating Salesforce claimant records in real time from public submissions to eliminate manual data entry.

EDUCATION

University of Foreign Language Studies - The University of Da Nang | Bachelor of Arts in English (GPA: 3.41/4.0) Da Nang, Vietnam | 2018 - 2022

APTECH Computer Education | Advanced Diploma in Software Engineering Da Nang, Vietnam | 2020 - 2022
